Von Chris Roberson : Aliens: Fire and Stone before purchasing it in order to gage whether or not it would be worth my time, and all praised Aliens: Fire and Stone:

KundenrezensionenHilfreichste Kundenrezensionen1 von 1 Kunden fanden die folgende Rezension hilfreich. A bit disappointedVon ChaosAfter reading Prometheurs I found this one disappointing... it's a prequel to Prometheus: fire and stone. It's shorter, the artwork isnt as good and neither is the story... still worth a read though but it's not worth this

amount of money in my opinion...

Kurzbeschreibung Directly tying in with the Prometheus and Aliens films, this excursion into terror is not to be missed! An unlikely hero tries to save a small group of researchers and miners from the doomed, deep-space Hadley's Hope colony--which is now infested with vicious xenomorphs! Terraforming engineer Derrick Russell takes control during an outbreak of aliens and leads his desperate survivors onto the Onager, a rickety mining vessel. This role is new to Russell, as are the horrors he and his crew will face both in space and on the strange planet they crash on.
